

SauceDemo Complete E2E Test Suite

Comprehensive Manual & Automated QA Test Cases (TC-1 to TC-21)

1. Positive E2E Purchase Flows (TC-1 to TC-4)

TC-1: Single-Item Purchase (standard_user)

Description: Verify that a standard user can successfully log in, add a single product to the cart, complete checkout, and place an order.

Step	Action Steps	Expected Result
1	Log in with valid credentials (`standard_user` / `secret_sauce`).	User lands on the products inventory page.
2	Click "Add to cart" on any product (e.g., Sauce Labs Backpack).	Cart badge updates to "1".
3	Open cart, click Checkout, enter details (`John`, `Doe`, `12345`), and click Continue.	User reaches the Checkout Overview page.
4	Click Finish .	Order Complete confirmation screen is displayed successfully.

TC-2: Multi-Item Purchase (3 items)

Description: Verify that a user can add multiple items to the cart and complete the checkout successfully.

Step	Action Steps	Expected Result
1	Log in as `standard_user`.	Inventory page loads.
2	Add 3 distinct items to the cart.	Cart badge displays "3".
3	Proceed to checkout, fill user information, and continue to overview.	All 3 items are listed correctly with correct total pricing.
4	Click Finish .	Order placed successfully.

TC-3: Sorted Products Purchase

Description: Verify product sorting functionality (Price: Low to High) and successful checkout of a selected item.

Step	Action Steps	Expected Result
1	Log in and select product filter dropdown. Choose **Price (low to high)** .	Products reorder correctly based on ascending price.
2	Add the lowest-priced item to cart and proceed to checkout.	Item is added and checkout progresses normally.
3	Complete checkout.	Order completed confirmation appears.

TC-4: Remove Item & Complete Checkout

Description: Verify that removing an item from the cart updates the cart state before completing the purchase.

Step	Action Steps	Expected Result
1	Add two items to the cart, then open the cart page.	Both items are visible in the cart.
2	Click **Remove** on one of the items.	Item is removed and cart badge updates to "1".
3	Proceed to checkout and click **Finish** .	Order completes successfully with only the remaining item charged.

2. Authentication & Error Flows (TC-5 to TC-7)

TC-5: Locked-out User Login Attempt

Description: Verify that a locked-out user cannot log in and receives an appropriate error message.

Step	Action Steps	Expected Result
1	Enter `locked_out_user` and `secret_sauce` on the login page.	Credentials entered.
2	Click **Login** .	Access is blocked with error: **Epic sadface: Sorry, this user has been locked out.**

TC-6: Wrong Password Correction Flow

Description: Verify handling of incorrect credentials followed by a successful login upon correction.

Step	Action Steps	Expected Result
1	Enter `standard_user` with an incorrect password (`wrong_pass`) and click Login.	Error message displays invalid credentials.
2	Correct the password to `secret_sauce` and click Login again.	Login succeeds and redirects to inventory.

TC-7: Empty Fields Login Validation

Description: Verify that submitting empty username and password fields triggers validation errors.

Step	Action Steps	Expected Result
1	Leave username and password fields completely blank, click Login .	Error message displays: "Epic sadface: Username is required" .

3. Checkout Field Validations (TC-8 to TC-11)

TC-8 to TC-11: Form Validation Checks (Missing First Name, Last Name, Postal Code, or All Empty)

Description: Verify that leaving required fields blank during checkout blocks progression and displays specific error messages.

Step	Action Steps	Expected Result
1	Leave First Name, Last Name, or Postal Code blank individually or together, then click Continue .	System blocks submission and displays corresponding required field error message.

4. Cancellation & Resume Flows (TC-12 to TC-13)

TC-12 & TC-13: Cancel on Information or Overview Pages & Resume

Description: Verify that canceling checkout returns the user safely to the cart or inventory without losing session state.

Step	Action Steps	Expected Result
1	Click Cancel during checkout info or overview pages.	User is redirected back; cart items are retained.
2	Resume checkout and complete order.	Order finishes successfully.

5. Account Variants & Edge Cases (TC-14 to TC-21)

TC-14 to TC-18: Account Variants & Session Checks

Description: Verify behavior across special test user accounts (`performance\_glitch\_user`, `problem\_user`, `error\_user`, `visual\_user`) and logout session termination.

Step	Action Steps	Expected Result
1	Execute purchase workflows using specialized accounts and test logout security.	App handles glitches/errors gracefully; logout terminates session securely.

TC-19 to TC-21: Negative & Edge Case Flows

Description: Verify SQL injection resistance, browser back-button behavior after completion, and page refresh handling mid-flow.

Step	Action Steps	Expected Result
1	Test SQL injection payloads, browser back navigation, and mid-flow refreshes.	Security is maintained, and application state is handled securely.
